In a leather edition for the 21st century and the new millennium !

The Harvard Classics is the 20th century's most celebrated collection of books. To some, it is as much an American institution as the university from which it takes its name, and where it was developed by Dr. Charles W. Eliot, the President of Harvard University.

These fifty volumes are Dr. Eliot's "Five-Foot Shelf of Knowledge." The Harvard Classics comprise more than 2,000 years — that's more than two millennia — of the world's greatest poetry, drama, philosophy, scripture, science, and more. These are the works which shape our thought, our language, our lives.

Now, The Easton Press is proud to present The Harvard Classics as originally issued in leather — in the finest edition ever seen !

Porcupine's Works; Containing Various Writings and Selections, exhibiting a Faithful Picture of the United States of America; of their Government, Laws, Politics and Resources; of the Character of their Presidents, Governors, Legislators, Magistrates, and Military Men; and of the Customs, Manners, Morals, Religion, Virtues and Vices of the People. Comprising also a complete Series of Historical Documents and Remarks, from the end of the War, in 1783, to the Election of the President, in March, 1801. **Complete in 12 octavo volumes.** London, Cobbett and Morgan, 1801. First edition. Cobbett, an English journalist and the son of farmer, served in the British Army in Nova Scotia and New Brunswick. He fled in 1792 to escape libel charges, and opened a bookstore and publishing house in Philadelphia. There he published "Porcupine's Gazette," numerous Tory and Federalist pamphlets, and the "Life and Adventures of Peter Porcupine." A prolific and vituperative writer, he attacked Thomas Paine and accused Benjamin Rush of killing Washington with incompetent medical care. Finding the climate inhospitable he moved back to England, where he reversed his opinions to the radical Republican point of view. He moved back to the US for two years to avoid debt and censorship, then returned to England. Among his many publications were the popular "Rural Rides" and an English grammar for the working class. "Cobbett has left a picture of the politics and leading politicians of America, which (with caution) must be studied by all who would understand the party questions which agitated America, and the violence with which they were discussed." (Sabin 14009). Early calf bindings quite dried out and worn at extremities, but holding well. A few hinges superficially cracked, and one hinge starting on volume 2. A few toned or foxed leaves, but on the whole clean internally. 唯一のコベット全集. [01409-100464]

The Complete Works of Samuel Taylor Coleridge. With an introductory essay upon his philosophical and theological opinions. In 7 vols. Edited by W. G. T. Shedd. New York: Harper & Brothers, 1853. According to the Publisher's advertisement: "This collection of Coleridge's Works contains all the productions of this author that have appeared in England, with the exception of his newspaper articles, which have recently been republished under the title of Essays on his own Times." (Although there was a single-volume edition of Coleridge's prose and works published in 1840, this seven volume set appears to be the first comprehensive collection published in America.) Portrait of Coleridge in vol. 7. Seven octavo volumes. Original publisher's binding: purple cloth, title gilt-stamped to spine, publisher's monogram within frames blind-stamped to sides, terra-cotta coated endpapers, all edges stained red. Pencil ownership on first blank of each volume, and a brief note in vol. 1. Ex-library: bookplate at front pastedown of each volume, but no other marks. Cloth has faded to brown on spines and the gilt has dulled, with some rubbing and light wear at heel, crown and corners. In particular, volumes 1-3 have some nicks or shallow loss at crowns. Clean and crisp within, and solid, handsome and very good overall. [01408-100471]

 SKINNER,Stephan**Etymologicon linguae anglicanae**, seu explicatio vocum anglicarum etymologica ex propriis fontibus, scil. ex linguis duodecim; Anglo-Saxonica... Runica... Franco-Theotisca... Danica... Belgica... Teutonica recentiori... Cambro-Britanica... Franco-Gallica... Italica... Hispanica... Latina... Graeca... Authore Stephano Skinner. Londini: typis T.Roycroft & prostant venales apud H.Brome [et al.], 1671. First edition, folio, unpagéd, and collating. Contemporary vellum panelled in blind, remains of crimson leather label, sprinkled edges. Front joint splitting at head, very good. Includes sections on botanical etymology, ancient names of English rivers and towns, and obsolete Anglican words. While the Etymologicon of Skinner "appears at first to represent a radical departure from the beaten paths of English lexicoraphy...there was a definite foreshadowing of the sort of work that Skinner published...It represents not something new under the sun of lexicography, but rather a convergence of significant influences...(Starnes & Noyes, pp.64-65). Holoyoke, Blount, Phillips and Minsheu had made earlier attempts at compiling English etymologies, but this work was issued at a time when Anglo-Saxon scholarship was being revived, and it had considerable influence over contemporary and later etymologists; and its comprehensiveness exceeded that of the earlier lexicographers. Indeed, the work was a major source for Johnson who acknowledges in his Preface his indebtedness to Skinner. 32x21cm.
SAMUEL MORLAND'S COPY, with scattered scholarly notes, one of which that to "Beard", is initialled, and the name completed in another early hand, presumably that of his son, also Samuel. Morland prepared an English-Latin dictionary which never appeared, although his son published, in 1723, in a pamphlet of 14 pages, "A Specimen of a dictionary English and Latin, compil'd by the late Mr.S.Morland F.R.S." As propos'd to be published'd by his son S.Morland F.R.S. His father's interest in the affairs of the Royal Society is reflected in a marginal note in the Praefatio to Skinner's dictionary, observing that Thomas Henshaw "was offered to be made presid.of ye Royal Society but refused bec.of some scruple abt.ye oath. Ye(?) Dr.Hally who told me this knew." The existence of this copy, together with the Specimen, serve to supply a small correction to Starnes' Renaissance Dictionaries English-Latin and Latin-English. In discussing Dr.Patrick's additions to the English-Latin part of the 1746

edition of Ainsworth's *Thesaurus Starnes* remarks that "many new phrases for this part he claims to have found in a manuscript compilation by Samuel Morland", to which he adds a footnote:
"Dr. Patrick's reference seems to be to Sir Samuel Morland, first baronet (1625-1695)...If he compiled such a manuscript as Dr. Patrick describes it has, regrettably, disappeared." (p.388-9). *The elder Morland was elected to the Royal Society in 1704, and presumably died shortly before the publication of the Specimen.* [d00037 -300037]

 Forcellini, **Totius Latinitatis lexicon**. Consilio et cura Jacobi Faccioliati opera et studio Aegidii Forcellini... The universal Latin lexicon... a new edition... by James Bailey. 2 vols. In 3. London Baldwin and Cradock: William Pickering, 1828. Best edition (first published in 1771); large 4to, portrait frontispiece, text in triple column; full contemporary calf neatly rebacked; a very good, sound and handsome copy. Faccioliati (1682-1769) and Forcellini (1688-1768) were both philologists and lexicographers at Padua, the latter being the student and later the collaborator of the former. Their editorial work on the 1719 Calepino convinced them of the need for a totally new work. Forcellini spent 40 years reading all of the classical Latin writers. He also studied inscriptions, coins, and medals. The resulting vocabulary is enormous, and proved to be the basis for all subsequent works of the kind. "Best edition of this classical and unrivalled performance. In it the Latin has been rendered into English; the Paduan supplement incorporated, and upwards of 20,000 words introduced by the learned editor. In the appendices will be found Tursellinus on the Particles of the Latin language, Gerard's Siglarium Romanum, and Gesner's etymological index" (Lowndes). Ebert 7788: "A greatly prized work."
